VEHICLES CHASING EACH OTHER FIRST STANDARD COMMITTEE

MEETING REPORT

The main topics and subtopics of standards are discussed in the meeting. With the participation of delegates from each group, the issues to be discussed and searched are determined. These topics can be listed as (they are listed from the most primary to least and the ones with same priority are marked with the same number):

1) Handshaking Protocol

- First signal sender
- Base
- Coding

2) Path Specialities

- Color
- Material
- Height
- Paint
- Sides (Borders)

2) Avoiding Collision

- Appearance of Robots
 - . Symbol(Electronic,physical)
- Structure of Robots
- Sensor Interference

3) Start Command

By regarding the priority of the topics, the whole members of the groups are assigned to do researches and experiments on their own. The results of those studies are going to be reported to the responsible instructor on the weekly design meeting.
