

Standard Committee Homework

1 Standard Committee Homework

1.1 Path Structure

Our proposed material is styrofoam. Isolation type styrofoams are more durable and strong compared to ordinary ones. A sample can be seen in *Figure 1*

Figure 1: A sample material

The green color RGB(0,255,0) is proposed as the path color.

1.2 Vehicle Appearance

A plate with dimensions 8cm x 10 cm should be installed with 3cm levitation from ground level. The color of the plate should be blue RGB(0,0,255).
